

Citycom partners with RingCentral, one of the leading Unified Communications as a Service (UCaaS) providers

Citycom's unique capabilities now available globally to RingCentral customers looking to utilize their business communications and address the Compliance consequences of hybrid working

Tuesday May 24, 2022 – United States, New York

Citycom today announced a global partnership with RingCentral which provides four-hundred thousand customers access to the Citycom ARC Platform.

“We are excited about this game changing partnership as our integrated solutions are available via the RingCentral App Gallery”, stated Tony Procops, CRO of Citycom. “The Citycom ARC capabilities address how to utilize communications data such as voice and video for business advantage as well as addressing concerns and issues surrounding the move to a more remote workforce.

Work-from-anywhere has created a new challenge for security, compliance, and HR teams managing collaboration platforms. Organizations of all shapes and sizes have come to realize that dynamic communication channels are the most susceptible to risky, non-compliant behavior and oversharing of sensitive information.

About Citycom Solutions

Citycom is an innovative, flexible and dynamic developer and supplier of solutions that enable our customers to utilize their data to gain insights while maximizing profit, reducing risk and enhancing customer and employee satisfaction.

Our customer and partner centric model helps to embrace the challenges of the digital communications world by leveraging leading edge, best of breed technology that drives change.
